

DER

THE CODE COACH PROJECT

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', which is clearly readable. This is the standard dummy text used in the printing and publishing industries.

THE
CODE
COACH
PROJECT

The first known actual bug causing a problem in a computer was a moth, trapped inside a Harvard mainframe, recorded in a log book entry dated September 9, 1947.[23] "Bug" was already a common term for a software defect when this insect was found.
